To Whom It May Concern:

It is my pleasure to write this letter of recommendation for *Ms. Zahra Amini*, a graduate of the Bachelor of Software Engineering program. I have known her since February 2016, and throughout these years, I have witnessed her academic growth and consistent effort in various courses and research activities.

Ms. Amini took the “**Logic Circuits**” course with me in Spring 2016 and the challenging “**Data Structures**” course in Spring 2017. Her performance in Data Structures, particularly in the practical implementation of algorithms, was outstanding. Demonstrating full command of C++, she successfully implemented complex projects, two of the most notable being “Converting Recursive Methods to Iterative Implementations” and “Modularized BST Deletion Algorithm.” These projects showcased her ability to write clean, efficient code and grasp the underlying computational costs of algorithms.

From the very first session, I recognized her as a highly attentive student with a genuine thirst for learning. She attended every class and always showed great curiosity. She was an active participant in class, frequently assisting her classmates with their projects and helping them troubleshoot their code. Her sense of responsibility towards others fostered an atmosphere of healthy competition within the class. Furthermore, she is known for being punctual; she consistently submitted all assignments and projects well in advance, often two days before the deadline. Her discipline served as a positive example, inspiring her classmates to improve their own performance.

This level of technical and coding proficiency was the primary reason I selected her as my **Teaching Assistant**. She served in this role for 3 years and 9 months, a long-term collaboration that stands as a testament to her responsibility, academic mastery, and strong ability to explain complex topics to students. She performed her duties excellently, including holding weekly problem-solving sessions, defining course projects, designing quizzes, and teaching C++ and coding techniques. Her dedication increased the students' interest and motivated them to work harder.

In addition to her technical capabilities, Ms. Amini excelled in the Research Methods and Presentation course with me, earning a perfect grade of **20 out of 20**. She delivered a comprehensive and practical presentation on “**Using LaTeX for Scientific Writing**,” which demonstrated her strong potential for research and academic writing.

Given her solid background in programming and extensive teaching experience, I strongly recommend Ms. Zahra Amini as a highly qualified candidate for admission to the Master's program at your department. Throughout my teaching career at the university, I have rarely encountered a student like Ms. Amini, who demonstrates such exceptional responsibility and dedication to the class goals and the progress of her peers.

Yours sincerely,

Somayeh Khajehasani, M.Sc.
